### SEEDS BALLS CAMPAIGN:

Seed bombing, or in some cases aerial reforestation, is a technique of introducing vegetation to land by throwing or dropping seed balls. Sowing tree seeds directly in the field is an old technique but it was little used until the development of repellents to protect seed from insects, rodents, and birds. Students participated in this campaign which was organized by Aurora Group of Institutions.

Sub: Permission to organize Blood Donation Camp-Reg.,

Dear Sir

I would like to bring it to your kind notice that Red Cross Society has agreed to organize a blood donation camp at our campus on 29<sup>th</sup> October, 2016 from 10:00 A.M to 3:00 PM. The expected number of donors from our college will be around 200 and for that Red Cross will be sending a team of 10 people including doctors and their assistants at our campus. We need to make certain arrangements for the campaign and a brief detail of them along with the budget required for them is mentioned below

S.No	Particulars	Budget
1.	Banner	300
2.	Lunch for Red Cross Team	1000
3.	Posters and Stationary	200
4.	Momentos	500

I seek your permission to proceed with the same.

Thanking you,

Your faithfully,

Suresh Akella  
to A.O, me

There is a request for blood donation camp.  
Any chances for us to conduct one?  
Akella

Dear Dr Suresh,

Sub: Request for voluntary blood donation camp.

Warm greetings from Thalassemia & Sickle Cell Society!!

As per my discussion with My Venugopal Rao I am sending you a request to conduct blood donation camp at your institute preferably on the anyone dates mentioned here i.e either 6th to 10th March, 13th/14th March or one date from 21st March to 28th March 2015.

Since 1998, the Society has been treating thalassemia affected and so far over 2030 patients both affected by thalassemia and sickle cell obtain free service from our centre. Thalassemia is an inherited disorder of the blood. It reduces the amount of hemoglobin (red blood cell) the body can make, thus resulting in the inability of the red blood cells to carry a sufficient supply of oxygen to different parts of body. This will cause anemia and if not treated, the heart and other organs in the body will slowly fail due to the lack of oxygen and may be fatal if not provided blood in time.

To provide constant supply of blood to thalassemics, the society took the lead to establish full-fledged Blood Bank for storing, processing and testing whole blood and its components. Over 1000 units of blood are required every month to treat beta Thalassemia affected children.

### SAFE DIWALI CAMPAIGN:

Safe Diwali Campaign: we can see how people get affected by the use of crackers, so we the NSS took a step to educate about safe diwali and also how to stop polluting the environment because of crackers. We raised our voice against use of crackers which are polluting the environment more than automobiles and also suggested tips for safe diwali.
