SREYAS INSTITUTE OF ENGINEERING & TECHNOLOGY

(Approved by A.I.C.T.E.New Delhi. Affiliated to JNTUH Hyderabad,Nagole, Hyderabad- 500068.)

ABOUT THE COLLEGE:

Sreyas Institute of Engineering & Technology was established in the year 2011 under the agencies of Sreyas Educational society. The Institute endeavors to impart high quality , competency based technical education in Engineering and technology to students with skills and abilities to face challenging needs of industry and society. The Institute is approved by All Indian Council for Technical Education (AICTE), New Delhi and affiliated to JNTUH.

VISION:

To be a centre of excellence in empowering the young talent through quality education and innovative engineering for the well being of society

MISSION:

1.Provide quality education with creative methodology and intellectual human capital.
2.Provide conducive environment for research and developmental activities.
3.Inculcate holistic approach towards nature, society and human ethics with life long learning attitude.

COURSES OFFERED:

UG COURSES:

B.Tech. Computer Science and Engineering
B.Tech. Electronics and Communication Engineering
B.Tceh Mechanical Engineering
B.Tceh . Civil Engineering

PG COURSES:

M.tech. Computer Science and Engineering.

ABOUT THE DEPARTMENT

The Department of Computer Science and Engineering since its inception in the year 2011 offers programme keeping in pace in technological advancements. Department offers Post Graduate course M.TECH – CSE . Importance to practical training which lay great stress on "hands on" experience besides a sound theoretical background is practiced. Short term courses and technical lectures by eminent professors and professionals are arranged on a regular basis to broaden theknowledge spectrum of students.The state-of-the-art computer centre has over 700 computers with 100 Mbps internet connectivity. The department has highly qualified and experienced faculty to offer both class room teaching and practical instructions.

SCOPE AND OBJECTIVE:

The understanding of grid computing helps in solving large scale scientific problems. This technology has been applied to computationally intensive scientific, mathematical, and academic problems, and it is used in commercial enterprises for such as drug discovery, economic forecasting, and data processing in support for e-commerce and Web services. Hence, it is necessary to understand the security issues in the grid and the cloud environment.

The training will provide a basic foundation on the concept of virtualization. This course provides a hands-on comprehensive study of Cloud concepts and capabilities across the various Cloud service models. This programme also provides practice on grid and cloud tool kits.

COURSE CONTENTS:

- Understand the evolution of cloud computing concepts and benefits
- Introduction to grid services architecture
- Evolution of infrastructure migration approaches (virtualization VMWare/Xen/KVM virtualization, adaptive virtualization, Cloud Computing and on-demand resource provisioning)
- Understand the Globus Toolkit architecture
- Gain competence in Hadoop/MapReduce as a programming model for distributed processing of large datasets
