## MACHINE LEARNING CONCEPTS AND ITS APPLICATIONS

BY DR. K. BALA PRAKASA RAO

Machine learning is a Method of Data analysis that automates Analytical Model building. It is a branch of Artificial Intelligence based on the idea that machines should be able to learn and adapt to experience. With unprecedented advancement in this field, we're now able to quickly and automatically produce models that can analyze bigger, more complex data and deliver faster, more accurate results – even on a very large scale. The Department of CSE has organized a one-day Guest lecture on **“MACHINE LEARNING CONCEPTS AND ITS APPLICATIONS”** on 4TH MAY 2021. The Resource Person Dr. K. Bala prakasa Rao, Asst. Professor, NIT Warangal in his Lecture explained the advancements in the field of Artificial Intelligence and Machine Learning and why it has now become a must-have skill. Students and Staff of the CSE Department participated in this event.

MACHINE LEARNING IS FASCINATING BECAUSE PROGRAMS LEARN FROM EXAMPLES. FROM THE DATA THAT YOU HAVE COLLECTED, A MACHINE LEARNING METHOD CAN AUTOMATICALLY ANALYZE AND LEARN THE STRUCTURE ALREADY RESIDENT IN THAT DATA IN ORDER TO PROVIDE A SOLUTION TO THE PROBLEM YOU ARE TRYING TO SOLVE.

The rapid growth of the internet and e-commerce needs a copyright protection mechanism and privacy-preserving techniques for multimedia data such as videos, images, animations and text. It is very difficult to restrict illegal modifications in digital media. Therefore, there is an ultimate need for the security & privacy of multimedia and the protection of digital rights data over the internet. There are basically different mechanisms for the protection of digital images such as cryptography, digital image watermarking and steganography. Multimedia technologies consist huge amount of multimedia data in the form of audio, video and images that are being practiced in many fields like medical fields, satellite information, digital forensics, surveillance systems. This book can help academicians and researchers to develop a shared vision and understanding the role of protection of digital media.

## THE BASICS

A STEP-BY-STEP TO LEARN AND PRACTICE C-PROGRAMMING

**SEELAM SAI SATYANARAYANA REDDY, MUKKALA ANANDA RANJITH KUMAR**

### C THE BASICS

C - The Basics have been established explicitly to meet the necessity of students keen to know all the basics of C-Programming and easy coding. Brief solutions to programs and exercises to practice on each chapter are offered here. It explains the widely misunderstood programming syntax and semantics. This book enlightens the concepts from elementary to advanced levels with an emphasis on the introduction to programming. It covers arrays, strings, functions, pointers, and files. Several solved examples make the content more relevant and improve the learning outcomes. It is a textbook for the first-level course on Computers and Programming. The whole emphasis of this book is to enhance the skills in Program Development instead of providing the readers with handy material.
