Kaushik Neppalli (founder of Cognidots Solutions LLP)

Pursued B.Tech in IT from JNTU affiliated college and passed out in the year 2009. I've 12 years of experience in the IT industry comprising of both MNC's and the start-up world. Worked in a few MNC's like HCL and Fidelity group.

I had an opportunity to complete certification on Data Science in the year 2014 from INSOFE which is affiliated to Carnegie Mellon University.
Post the completion of the course, I worked for one of the companies under Fidelity group on Big Data Technologies. I also happen to be a Data-science consultant for a few start-ups and established firms.

Projects handled so far as a Consultant :

- Built an end-to-end product based on Python and included the concepts of Robotic Process Automation(RPA) for an NABL certified electrical company.The product envisages to enhance the productivity of the firm by drastically reducing the manual effort of human from 7 days to a mere 30 seconds.

- Built a predictive model to predict when a cloud server can go down based on its server pulse rate. Delivered this work to a Fortune 100 company.

- As a part of consulting, I've trained teams at established firms to build analytics applications and also on other areas of machine learning and AI.
