

REPORT ON ELECTRO HUNT

Title of the event: ELECTRO HUNT

Date: 27/03/2024

Venue: Sreyas Institute of Engineering and Technology, Hyderabad.

Number of participants: 48 students from all the branches.

About the event:

The Electro Hunt event at Sreyas Institute of Engineering and Technology organized by the Department of Electronics and Communication Engineering aimed to engage students in a fun and educational exploration of electronics and electrical concepts. Combining elements of a treasure hunt with technical challenges, the event encouraged teamwork, critical thinking, and hands-on problem-solving. The Electro Hunt was organized in several stages. Firstly, the event commenced with an orientation where participants were briefed about the rules, objectives, and the layout of the hunt. Participants were divided into teams, ensuring a mix of skills and backgrounds to foster collaboration. Teams navigated through various stations, each presenting a unique challenge related to electronics and electrical engineering. Challenges included Solving circuit puzzles, Identifying components, Completing practical tasks (e.g., building a simple circuit) and Answering trivia questions related to electrical theory. After completing all stations, teams faced a final challenge that required them to apply their accumulated knowledge and skills to solve a complex problem. The winners, recognized for their teamwork, creativity, and problem-solving skills are awarded.

Conclusion:

The Electro Hunt at Sreyas Institute of Engineering and Technology was a resounding success, promoting a deeper understanding of electronics while encouraging teamwork and critical thinking. Organizers are excited to continue this initiative in subsequent years, aiming to enhance the experience and broaden participation.
