Central Academic Committee

Minutes of the Meeting

The meeting was commenced on 15-09-2023 at 3.00PM at Principal's chamber with the Chairperson welcoming all members to discuss the following Agenda points:
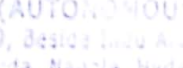

1. Academic activities
2. Result analysis
3. Student attendance
4. Any other issues with the permission of the chair

The minutes of the meeting are as follows:

- Suggestions for curriculum enhancement and incorporation of industry-oriented projects were discussed.
- Identified subjects with high failure rates and discussed the need for targeted interventions.
- Faculty to prepare detailed improvement plans for low-performing subjects by 25th September 2023.
- Departments to initiate mentorship programs for students needing additional academic support.
- Concerns raised over declining attendance in specific courses.
- Departments to send reminders to students and parents regarding attendance requirements.

Closing Remarks

The Chairperson thanked all members for their active participation and constructive suggestions, and adjourned the meeting.

Central Academic Committee

MINUTES OF THE MEETING

The meeting was commenced on 06-11-2024 at 11:00AM at Principal's chamber with the Chairperson welcoming all members.

Agenda:

1. Academic activities
2. Finalization of feedback form
3. Result analysis
4. Time tables
5. Any other issues with the permission of the chair
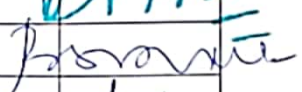

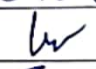

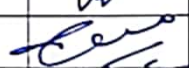

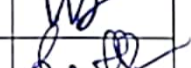

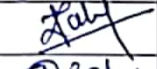

The minutes of the meeting are as follows:

Members discussed and proposed the following changes to the feedback form:

- Inclusion of course objectives and outcomes
- Updates on ongoing academic activities were presented.
- The updated version of the student feedback form was finalized to be implemented from the up-coming semester.
- Analysis of the recent semester results was presented, highlighting subject-wise performance and improvement areas.
- Draft timetables for the upcoming semester were presented.
- Proposal for an interdepartmental sports meet was discussed

Closing Remarks

The Chairperson thanked all members for their active participation and constructive suggestions, and adjourned the meeting

Dr. K. SAGAR
B.E., M.Tech., Ph.D
Principal & Professor in CSE
Srevas Institute of Engineering and Technology
Hyderabad, Telangana-500 068.

UNIT	CO	L.NO:	TOPIC	COURSE OBJECTIVES	COURSE OUTCOMES	KEY NO	KEY WORD
UNIT - 1	CO - 1		UNIT-1 - TOPOLOGY AND MAGNETIC CIRCUITS				
		1	Network Topology, Terminology	To Understand the basic concepts on RLC circuits	Gains the knowledge on basic network elements	1	Basic RLC
		2	Basic cutest and tie set matrices for planar networks			2	Topology
		3	Magnetic Circuits, Self and Mutual inductances			3	Magnetic Circuit
		4	Dot convention				
		5	Impedance, reactance concept, Impedance transformation				
		6	Coupled circuits				
		7	Equivalent T for Magnetically coupled circuits				
		8	Ideal Transformer				
UNIT - 2	CO - 2		UNIT- II - STEADY AND TRANSIENT ANALYSIS				
		1	Steady state and transient analysis of RC, RL and RLC Circuits	To know the behavior of the steady states and transients states in RLC circuits	Learns and analyze the RLC circuits behavior in detail	1	Initial conditions
		2	Circuits with switches			2	Transient state
		3	Step response, 2nd order series and parallel RLC Circuits			3	Resonance
		4	Root locus				
		5	Damping factor				
		6	Quality factor and bandwidth				
		7	Resonance, resonance curves				
UNIT - 3	CO - 3		UNIT- III : TWOPORT NETWORKS , NETWORK FUNCTIONS AND ATTENUATORS				
		1	Two port network parameters	To understand the two port network parameters	Learns and gain the knowledge in characteristics of two port network parameters(Z,Y,ABCD,h & g)	1	Network Parameters
		2	Z, Y, ABCD, parameters			2	Image Parameters
		3	h and g parameters			3	Characteristic impedance
		4	Characteristic impedance, Image and iterative impedance				
		5	Image transfer constant				
			NETWORK FUNCTION				
	CO - 4	1	Network function	To understand the concept of attenuators and impedance matching.	Learns the concept of attenuators and impedance matching	1	Network Functions
		2	Transformed (S) variables			2	Transformed Variables
		3	Attenuators			3	Attenuators
		4	Poles and Zeros				
			UNIT-IV: TRANSMISSION LINES-I				
		1	Types of Transmission Lines	To understand different type of transmission lines and their characteristics	Gains the knowledge on different type of transmission lines and their characteristics	1	Loss Less Line
		2	Primary and Secondary Constants			2	Distortion and types
		3	Loss Less Transmission Lines			3	Loading and Types

UNIT	CO	No.	Topic	Course Outcome		No.	
UNIT -	CO - 5	4	Phase and Group Velocity				
		5	Distortion and Types				
		6	Minimum Attenuation				
		7	Loading and Types				
		8	Infinite Line				
UNIT - 5	CO - 6		UNIT-V TRANMISSION LINES -II				
		1	Input Impedance Relations	To understand different type of transmission lines and their characteristics	Learns smith chart and its applications.	1	Reflection and VSWR
		2	OC and SC Lines			2	Impedance matching
		3	Reflection Coefficient			3	Smith Chart
		4	VSWR				
		5	Impedance Transformation				
		6	Smith chart Configuration				
		7	Applications of Smith Chart				
		8	Single Stub matching

Answer any four of the following:

	CIE-I Descriptive	Marks	CO	Cognitive Process Dimension
1	(a) Find the reduced incidence matrix and fundamental cut-set matrix for the circuit given below.	5	1	4,2
	(b) Explain briefly about ideal transformers.			
2	(a) Define coefficient of coupling. Also derive its expression for two magnetically coupled coils.	5	1	4,4
	(b) Find the equivalent inductance of the following circuit.			
3	Derive the expression for transient response of R-L series circuit for DC excitation.	5	2	4,4
4	(a) Prove that the resonant frequency of series RLC circuit is geometric mean of half power frequencies.	5	2	4,4
	(b) In a parallel RLC circuit, find resonant frequency, bandwidth, quality factor and upper half power frequency if R=100Ω, L=5mH, C=10μF and supply voltage is 230V.			
5	(a) Find the Y parameters for the following circuit (b) Express hybrid parameters in terms of impedance parameters.	5	3	4,2
6	(a) Find the inverse hybrid parameters for the following circuit.	5	3	4,4
	(b) The number of turns in two magnetically coupled coils is 250 and 750 respectively. When 2.5 A current flows through coil-1, the total flux in this coil is 0.3mWb and the flux linking with the second coil is 0.15mWb. Determine L1, L2, M and K.			

Answer any four of the following:

	CIE-II Descriptive	Marks	CO	Cognitive Process Dimension
1	(a) What is a High pass filter? Also derive the expressions for cutoff frequency, attenuation and phase shift of a constant-K high pass filter.	5	5	4,5
	(b) Design a prototype HPF has cutoff frequency of 10KHz and design impedance of 600Ω. Also find the attenuation and phase shift at a frequency of 8KHz.			
2	(a) Derive the necessary equation for a m-derived T-section LPF from a proto type filter.	5	5	4,4
	(b) A prototype LPF has cutoff frequency of 5KHz and has a matched impedance of 600Ω. Calculate the values of the filter. Find the attenuation and phase shift at a frequency of 8KHz.			
3	(a) What is phase velocity and group velocity? Establish the relation between them.	5	6	4,4
	(b) The attenuation constant on a 50 ohm distortionless transmission line is 0.01 dB m. The line has a capacitance of 0.1 nF m. Find the resistance, inductance and conductance per meter of the line.			
4	(a) Derive the condition for distortion less line.	5	6	4,4
	(b) The values of primary constants of a open-wire line per km are R=10Ω, L=3.5mH, C=0.008μF and G=0.7μδ. For a signal frequency of 1000Hz, calculate the characteristic impedance, attenuation constant, phase constant, wavelength and phase velocity.			
5	(a) Derive the impedance equation of image impedance of a symmetrical-T network.	5	5	4,2
	(b) Explain about each driving point functions using laplace transform.			
6	(a) What is loading? Explain the different types of loading?	5	4,6	2,4
	(b) Find the driving point impedance and admittance of the given network.			

Bloom's Taxonomy

create — Produce new or original work
Design, assemble, construct, conjecture, develop, formulate, author, investigate

evaluate — Justify a stand or decision
appraise, argue, defend, judge, select, support, value, critique, weigh

analyze — Draw connections among ideas
differentiate, organize, relate, compare, contrast, distinguish, examine, experiment, question, test

apply — Use information in new situations
execute, implement, solve, use, demonstrate, interpret, operate, schedule, sketch

understand — Explain ideas or concepts
classify, describe, discuss, explain, identify, locate, recognize, report, select, translate

remember — Recall facts and basic concepts
define, duplicate, list, memorize, repeat, state

Circular

Date: 15-09-2023

This is to inform all faculty members of Department of Computer Science & Engineering to attend the meeting on 18-09-2023 at 3:00 pm at HOD's cabin to discuss the following agenda points:

- Mentor-mentee allocation for semester, academic year 2023-2024.
- The process for mentoring.
- Roles and responsibilities of mentors.

Minutes of Meeting

Date: 15-09-2023

The meeting was commenced on 15-09-2023 at 3:00 pm in HOD's Chamber with the Chairperson Dr.U.M.Fernandes Dimlo, Head of the Department, CSE.

Agenda:

1. Mentor-mentee allocation for the academic year 2023-24.
2. The process for mentoring.
3. Roles and responsibilities of mentors.

Minutes of Meeting are as follows:

- Mentor-Mentee Allocation for the Academic Year 2024-25 was finalised.
- It was agreed that each faculty member would be assigned 18-20 mentees from the Second-year,third- year and fourth – year.
- The allocation list was reviewed and finalized, ensuring a balanced distribution among faculty members.
- The finalized list will be circulated to all mentors by 15-09-2023.
- The mentoring process includes regular one-on-one meetings, group interactions, and follow-ups with coordinator.
- Instructed the mentors to conduct a meeting once a week with each mentee.
- Special emphasis to be placed on ensuring open communication to address mentees' academic, personal, and career-related concerns.
- Roles and responsibilities of mentors are finalised and requested to circulate to all the respective mentors immediately.

Closing Remarks: The chairperson thanked all the faculty members for their active participation and constructive suggestions, and adjourned the meeting.

Coordinator

Head of Department

Department of Computer Science & Engineering

SIET has established a well-organized Mentor-Mentee system, where mentors act as a guiding figure for students, offering continuous support, knowledge, and advice. They play a crucial role in bridging the communication gap between parents and the college by regularly updating parents on the student's progress and important college developments. The core of effective mentoring lies in building a strong, trustworthy relationship between the mentor and mentee, which:

- Prioritizes the individual needs of the student.
- Ensures ongoing communication with parents, facilitating close monitoring of the student's growth and development.

Mentor-Mentee Ratio: 1:18

Guidelines for Mentor:

1. Mentor-Mentee meetings will be held regularly, once a week during the designated mentoring hour. Updates will be recorded in the mentoring file provided to each mentor.

2. Mentors should assist students in updating their personal information on first page of mentoring book. The attendance, internal mid-term marks, and external exam marks are updated in its subsequent pages. The booklet also tracks meetings held with the mentor and, when necessary, with the Head of Department (HOD).

3. Each mentor is responsible for counseling their mentees in the following areas:
   - ✓ Understanding of the subject matter
   - ✓ Attendance percentage
   - ✓ Punctuality and regularity
   - ✓ Behavior (including discipline and issues like ragging)
   - ✓ Engagement in academic activities
   - ✓ Research and project work
   - ✓ Participation in co-curricular and extracurricular activities

4. Orientation Programs and Parent-Teacher Meetings (PTMs) are organized once per semester as part of best practices, aiming to actively involve parents in the mentoring process.

5. A monthly mentoring report must be submitted to the Mentoring Coordinators for review.

Department of Computer Science & Engineering

Mentor – Mentee Allocation List for A.Y. 2023-2024

Year & Section	Roll Numbers	Mentor Name	Total no. of Students Allotted
II CSE A	22VE1A0501-22VE1A0518	Mrs.Joshi Padma	18

Department of Computer Science & Engineering

Student Feedback–Introduction

An online centralized procedure is used to get the feedback. The Head of Department (HOD) will propose disciplinary actions to each faculty member based on their overall evaluation. Only students with an attendance rate of 75% or higher are eligible to provide feedback.

All aspects of the teaching and learning process are taken into account when designing a common feedback system at the institutional level for all years. Every semester, we survey students in all four years (I through IV) to get their thoughts on various topics. Prior to the initial internal review, it is gathered through an internet portal

It's measured on a 5-point scale, with 5 points for "Excellent," 4 for "Good," 3 for "Average," 2 for "Satisfactory," and 1 for "Poor." For each term, online feedback is gathered through the students' portal based on the following factors:

- Is the teacher adequately prepared for the class and provides a clear explanation?
- Is the teacher able to communicate effectively through their body language and distinct voice?
- Is the instructor capable of maintaining order and control in the classroom?
- Is the teacher able to captivate the attention of students and address any questions?
- Is the teacher punctual and consistent?
- Do you perceive the teacher as impartial and truthful in their evaluation of papers and personal remarks?
- Are you inspired by the teacher both inside and outside of the classroom?
- A comprehensive evaluation of the instructor.

Feedback Analysis Process

The calculation of the student's Weighted Average Score (WAS) forms the basis of their feedback analysis procedure.

Weighted Average Score(WAS)

- The formula for calculating the weighted average score for each student's feedback is WAS= Total acquired Points/ (Max Points (i.Excellent-4)* No. of Students* No. of questions). This is done for each piece of feedback.

- To determine teacher feedback, the average of WAS for the relevant class is used.

Rewards/Corrective measures:

The Head of Department (HOD) will either reward the faculty member or counsel/take corrective measures based on the feedback. The students' rating on a scale of 1 to 4 will determine whether they will receive a reward or require counselling. The HOD initiates correctiveactionsineachcourseifthefaculty'sperformanceindexislessthan0.65.

Corrective measures:

Faculty members who receive less than 65% of feedback will receive counselling from the Head of Department (HOD) and will be directed to the Domain Lead Committee or Department Advisory Committee. Proper corrective measures, such as attending senior faculty lectures, participating in demonstration lectures, or receiving counselling from the HOD, will be implemented. Additionally, faculty members may enroll in online courses such as NPTEL. They conduct a thorough examination of the feedback and identify their deficiencies. The head of department (HOD) will recommend to the principal that the faculty member be forewarned if the student feedback is unfavorable, despite the implementation of these measures. The following are the award forms and corrective measures.

Reward

- Certificates of appreciation letters) and/onwards for the finest teacher will be presented to faculties that achieve exceptional academic results.
- Faculty will receive incentives for publishing their research in reputable journals and conferences.

Appreciation Letter

To

Dr. V. M. FERNANDES DIMLO

_____

_____

Subject: Appreciation for Your excellent feedback

Dear Dr. V. M. FERNANDES DIMLO

Your extraordinary devotion and commitment to our students' development is much appreciated, and on behalf of the Sreyas Institute of Engineering and Technology, Hyderabad, I wish to convey my deepest gratitude.

Your efforts in fostering an engaging and inclusive learning environment have been truly commendable. The enthusiasm and innovative teaching methods you bring to the classroom not only inspire students to excel academically but also help them develop critical life skills and values. The positive feedback from students and parents alike is a testament to the influence you have had on their lives.

We look forward to your continued contributions to the growth and success of our institution.
